Testimonials

See what our **happy users** are sharing about us!

oking for people
re our vision!
our time used to
up by most of
administrative
areas now we can
building out to
employees."

"This powerfull tool eliminates the need to leave Salesforce to get things done as I can create a custom proposal with dynamic pricing tables, and get approval from my boss all within 36 minutes."

Nattalia Larrasor

"We're Hiering for people who share our Mission! most of our time used to be taken up by most of alternate administrative work whereas now we can focus on building out to help our employees."

Sarah

"We're looking for people who share our vision! most of our time used to be taken up by most of alternate administrative work whereas now we can focus on building out to help our employees."

Ananya Yohn

"This powerfull tool eliminates the need to leave Salesforce to get things done as I can create a custom proposal with dynamic pricing tables, and get approval from my boss all within 36 minutes."

Mark windel

Design amazing digital experiences
that create more happy in the world.

About Us – Empowering the Builders of Tomorrow

We believe in democratising entrepreneurship by giving every innovator the tools to succeed.

Ask the Team

1. bring little bit down so it looks like in middle of the background ball.
2. background ball in blue colour which looks good in design

Born From Experience, Built for Entrepreneurs

How it all began

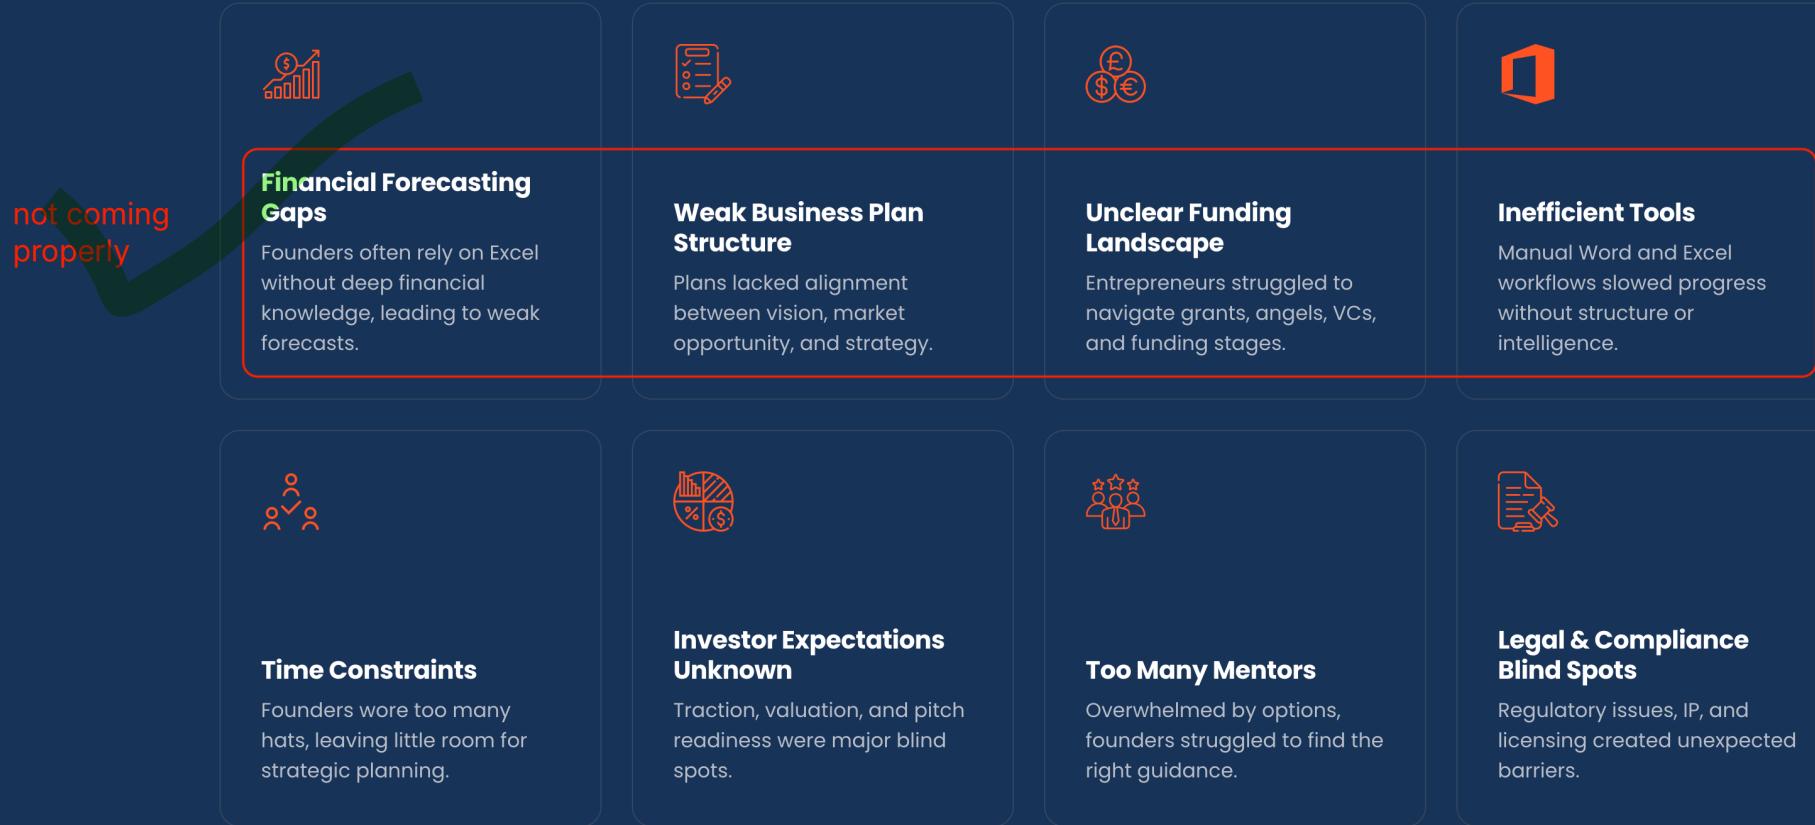

The Source began with a global journey that spanned 22 states across 17 countries. Along the way, our founder connected with more than 100 startups, mentors, and investors. Despite their diverse backgrounds, the stories echoed the same challenges—unclear funding pathways, fragmented tools, and uncertainty about investor expectations. These insights became the foundation for building a platform designed to transform how entrepreneurs plan, grow, and succeed.

These insights became the foundation for building a platform designed to transform how entrepreneurs plan, grow, and succeed.

not coming properly (written in red on the left side)

- Financial Forecasting Gaps**
Founders often rely on Excel without deep financial knowledge, leading to weak forecasts.
- Weak Business Plan Structure**
Plans lacked alignment between vision, market opportunity, and strategy.
- Unclear Funding Landscape**
Entrepreneurs struggled to navigate grants, angels, VCs, and funding stages.
- Inefficient Tools**
Manual Word and Excel workflows slowed progress without structure or intelligence.
- Time Constraints**
Founders wore too many hats, leaving little room for strategic planning.
- Investor Expectations Unknown**
Traction, valuation, and pitch readiness were major blind spots.
- Too Many Mentors**
Overwhelmed by options, founders struggled to find the right guidance.
- Legal & Compliance Blind Spots**
Regulatory issues, IP, and licensing created unexpected barriers.

Architecture Concepts

The Basics

From insight tab in admin

Introduction

All of the configuration files for the Laravel framework are stored in the `config` directory. Each option is documented, so feel free to look through the files and get familiar with the options available to you.

These configuration files allow you to configure things like your database connection information, your mail server information, as well as various other core configuration values such as your application timezone and encryption key.

[Application Overview](#)

In a hurry? You can get a quick overview of your application's configuration, drivers, and environment via the `about` Artisan command:

```
php artisan about
```

which module we using in ADMIN panel to make changes in this page

Appear Animations

A collection of smooth animations to use within your page via Anime.js library.

We used [Anime.js](#) library for animations, is a lightweight JavaScript animation library with a simple, yet powerful API. It works with CSS properties, SVG, DOM attributes and JavaScript Objects.

Usage

We made it easy to deal with [Anime.js](#) and even easy to implement just by using data attributes instead of initiating animations via javascript code.

To configure [Anime.js](#), use the `data-anime` attribute and thier options or our built-in options below. It supports 3 different modes so the animations will start when element clicked, hovered or when it's on viewport, more details on the options table below.
